BUILDING A 21ST CENTURY HEALTHCARE SYSTEM

WorldCare Consulting and Advisory
MOI Vision for a New Healthcare System

The Ministry of Interior (MOI) has direct and immediate commitment to the healthcare needs of four million Saudi citizens, representing their employees and dependents. The MOI has engaged WorldCare and its Partners (Cannon Design and Source Atlantic) to provide a methodology to address their commitment and needs. In keeping with best practices, WorldCare recommended the MOI create and adopt a “Population Health Management” approach.

MOI Plan for Population Health Management

- Disease Prevention
- Health Maintenance and Wellness
- Accurate Disease Diagnostics
- Optimal Cutting-Edge Therapeutics
- Rehabilitation
- Healthy Ageing

MOI Execution of the Medical Strategy

Integrated Patient Care

- Primary Care Network
- Community Hospitals
- Tertiary Care Hospitals
- Rehabilitation Centers
- Behavioral Health Centers
- Wellness Centers

MOI Medical Cities: Advanced Tertiary Care Centers

Evolution and Milestones

The MOI has positioned the Medical Cities for outstanding patient care, accreditation and globalization.

Upon WorldCare’s recommendation, the MOI established the following Centers of Excellence for the two medical cities:

- Cardiovascular
- Cancer
- Emergency, Trauma & Burn
- Women’s Health
- Pediatrics
- Diabetes & Metabolism
- Musculoskeletal
- Neuroscience & Behavioral Health
- Rehabilitation

The above are supported by comprehensive state-of-the-art diagnostics: radiology and laboratory medicine.

Ensuring Alignment between Support Functions and Medical Strategy

- Safe and quality patient and family experience
- Site design is optimized and accounts for future growth
- Medical staff living environment is properly developed and supports recruiting and retaining
WorldCare Consulting and Advisory

Challenges Facing Healthcare Today

- Aging population → increased chronic illness
- Increased public medical awareness → increased demand for advanced healthcare services
- Deterioration of Patient-Doctor relationship/ lack of trust
- Shortage of highly-specialized medical professionals in most fields
- Limited access to advanced medical talent
- Unequal distribution of advanced and quality medical services
- Fragmented health system creating confusion for the average citizen seeking quality medical care

The New Approach for 21st Century Healthcare

It is a revolution, not an evolution, epitomized by Population Health Management.
